Winter Options

- ▶ Wheel & Tire packages from:\$2485. +Taxes
- ▶ Tire packages from:\$952.³² +Taxes
- ▶ With winter still in our midst, we could potentially expect to see snow / ice on our coastal roads until March. The temperature only needs to be just under 7 degrees Celsius for driving conditions to be compromised. The rubber compound of summer and all-season tires become very hard, where traction and stability are minimized. Winter packages available for all Audi models, can include original equipment winter alloy wheels & performance winter tires. Contact your parts specialist today for details and

All Engine Air Filters

- ▶ A new air filter will increase gas mileage, reduce emissions, allow optimal air flow and improve engine performance. In addition, changing your air filter regularly will protect the engine and vital internal engine parts from excess wear and damage that result in drivability issues and potentially expensive engine repairs.

Expiration date: 03.31.2012

All Wiper Blades

Wiper blades are exposed to many weather extremes, rain, dust, snow and debris, apart from a host of other pollutants that can obstruct your view. Wiper blades are generally made of a rubber-based compound which over a period of time becomes hard and brittle. When the wiper blades reach this stage they are unable to clear the windshield properly resulting in a streaky or dirty windshield where your safety can become compromised. Top leading factors in vehicle accidents are due to vision. Another problem is that hard wiper blades can cause irreparable damage by scratching the windshield. To make sure your windshield wipers always provide maximum vision and safety it is recommended they to be replaced every 6 months.

Expiration date: 03.31.2012

FROM \$ 150.00

Don't get caught in a no start situation.

- ▶ FROM \$ 150.00 Battery
- ▶ Don't get caught in a no start situation.
- ▶ On average 2/3 clients wait until their battery leaves them stranded before they get it replaced.
- ▶ Waiting until your battery is dead can create a terrible inconvenience and can cost you a lot of money, especially if you have to call a tow truck.
- ▶ The time to start thinking about replacing your battery is before it dies.
- ▶ While in for your next service ask to have your battery tested to ensure battery life is sufficient.
- ▶ The average life of a battery is about 4-1/2 years but several factors can drastically shorten its life.
- ▶ Some examples include:
 - ▶ Cooler (winter conditions) temperatures.
 - ▶ Faulty vehicle charging system.
 - ▶ Running electrical equipment with the vehicle off.
 - ▶ Frequent short distance trips. Trips of less than 20
