P6 FourSeasons is a tire designed for the latest generation of Sports and Luxury Touring Sedans where comfort, high-speed stability and safety are the essential requirements.

It includes a technological platform that gives the P6 FourSeason a special footprint (contact patch) making the P6 FourSeasons a reliable tire, secure on wet surfaces, assured when braking, quiet on the road and resistant to all types of road stress.

The benefits are more grip and total stability, with less tire fatigue and thus longer mileage. The P6 FourSeasons reduces fuel consumption and atmospheric pollution.

Tread pattern

The P6 FourSeasons has wide ribs with curved grooves for better traction and braking, working together with the continuous ribs to improve comfort and even wear. Continuous channels ensure faster and more effective water expulsion from the contact patch. A full central rib gives steering precision, ensures stability and improved handling.

Offer Valid Until June 30,2008
